About Forumtec

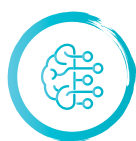

Founded in 1987 by three innovative engineers on a mission to revolutionize dental care, today Forum Engineering Technologies (Forumtec) is a leading developer and manufacturer of electronic dental devices and advanced dental equipment.

Following a decade of success delivering solutions for dental technicians and acquiring vast industry knowledge, Forumtec's next giant leap was in 1998 when the company launched its first apex locator, the Bingo-1020. This patented, revolutionary technology completely transformed root canal treatments and has since become common practice across the dental industry, with Forumtec technology leading the market. Today, various models of Forumtec's Apex Locators are produced and marketed as both proprietary and OEM products, distributed through leading international brands and achieving a 35% market share.

Reinventing dental procedures yet again, Forumtec's new venture aims to transform implant treatments through innovative technology. Leveraging three decades of experience, Forumtec's revolutionary Spotter implant detector is a unique solution that accurately detects implants covered by gum tissue, to optimize the procedure for both the dentist and the patient.

Leaning on 30 years of experience, Forumtec will continue to redefine solutions in dental equipment, always introducing new technological breakthroughs that will change the way dental professionals treat their patients, ensuring better, faster, and simpler procedures.

wireleX

Smart Wireless Apex Locator

For a convenient cable-free work environment

Wirele-x Smart Apex Locator

The Wirele-x, state-of-the-art apex locator system, is the most innovative solution of its kind, incorporating advanced wireless Bluetooth technology to eliminate the need for long cables.

The world's first and only wireless apex locator system offers the following features:

Unique design

wireless, 7" high-resolution touch screen, linked by Bluetooth technology to a mini measuring unit

User friendly

eliminates the need to manage long cables between the apex locator and patient

Clear and simple results presentation

a detailed, informative, and diversified user interface allows for easy, convenience operation

Reliable

high accuracy, based on Forumtec's renowned patented measuring algorithm

Simplified measurements procedure

demonstrates scale and numerical values along the root canal and beyond the apical foramen

RomiApex™ A-15

To achieve a high level of accuracy and precision

RomiApex A-15 Mini Apex Locator

A mini and powerful apex locator that takes up minimal space during treatment and provides dental professionals with all essential information to support the measurement procedure, clearly presented on a color LCD display with large apical zone.

User friendly

Easy to operate

Ultimate display

Clear and wide LCD display provides you with all the data that you need.

Flexible

Suitable for measuring in both wet and dry canals.

Great Value

Excellent price, delivering exceptional value for money

Reliable

High accuracy, based on Forumtec's proven patented measuring algorithm

spotter
Smart Implant Detector

Accurately detects dental implants

Spotter Smart Implant detector

An advanced electronic device that accurately locates dental implants covered by gum tissue and bone minimizing pain, reducing healing and chair time to maximize the benefit for both patient and doctor

An essential device to add to your toolbox when implant location identification is necessary

- ✓ Better than x-ray, it detects implants at any position or angle
- ✓ Reduces complications by eliminating the need to sever the gums
- ✓ Accurate and reliable
- ✓ Suitable with various Titanium implant systems
- ✓ Ergonomic and user-friendly design
- ✓ Detachable sensing heads for easy sterilization
